## Product Specifications

The appliance has been certified for use with either Natural Gas (NG) or Propane Gas (LP), and NOT for use with solid fuels.

These direct vent gas fireplace heaters are sealed combustion, air-circulating gas fireplaces approved for indoor use. For indoor installation they must be installed maintaining required clearances. Refer to manual for clearance distances. Installation is recommended in living spaces such as bedrooms, living rooms, great rooms, etc. The appliance is not approved for closet installation.

The appliance must be properly connected to a venting system.

The appliance must be installed according to Ortal USA requirements in addition to any local codes that may apply. If none exist then the current CSA installation code must be followed:

- USA, ANSI Z223.1/NFPA 54
- Canada, CSA B149
